PREMIUM SOLUTIONS

TOOLS

“Reaxing products range is enriched by a full selection of innovative tools conceived for functional training.”

Innovation is the keyword as everything is based on an innovative technology, innovative material choices, unique finishing and design. The “**Shock Absorber System Technology**” reduces the impact on any surface, due to the combination between chemical, physical and elastic properties of cross-linked polymers and the provided “**air shock**” devices. Due to the above mentioned technology and the elastic behavior of the material, this entire range of products (including Kettlebells and Bodybars) has a “**soft impact**” when dropped on the floor, quickly going back to its original shape.

Reaxing is the first company in the world to develop a training methodology and a product range exploiting the “Sudden Dynamic Impulse” technology. Unpredictable stimuli train your senses and take training to a much higher level in terms of quality and quantity by increasing sports performance and metabolic activity, improving muscle reaction time and reliability in post-trauma recovery phases, as well as reducing the risk of injuries.

Reaxing Tools are professional products designed and produced in Italy. Their particular cross-linking structure makes them pretty much unbreakable and safe in terms of injuries prevention and cleanliness.

REAXING TOOLS

STORAGE

“Style and design get together to create storage solutions for all Reaxing Tools”

Depending on the space requirements, Reaxing developed different solutions combining quality and materials efficiency. The chrome-plating feature of the storage solutions gives a touch of elegance and originality to any environment. It is also possible to develop wall-mounted storage solutions to store several accessories. The user can easily adjust and implement the walls according to his needs.
