REAXING

FLUIKETTLE

“It’s the one and only strong, safe, soft and dynamically unstable kettlebell in the world.”

The kettlebell is one of the most widespread tools for functional training, incredibly versatile for the high number of workouts it can be used. The FluiKettle is the only one of its kind: in fact it can be shaken, grabbed, thrown, significantly reducing the risk of damage for people and surfaces. Thanks to these features it can be used in clubs and at home. Unlike a simple cast iron kettlebell, the FluiKettle contains a mixture of solid and fluid matter which turns every workout into a genuine neuromuscular training, much more effective from the metabolic point of view. The special feel and the chromatic feature of the FluiKettle turn the heavy work of the motor activity into a pleasant and harmonic movement. Unlike the traditional cast iron product, the FluiKettle’s special material guarantees comfort during the workout execution because it is soft on the person.

Reaxing is the first company in the world to develop a training methodology and a product range exploiting the “Sudden Dynamic Impulse” technology. Unpredictable stimuli train your senses and take training to a much higher level in terms of quality and quantity by increasing sports performance and metabolic activity, improving muscle reaction time and reliability in post-trauma recovery phases, as well as reducing the risk of injuries.

TECHNICAL SPECS

The FluiKettle is available in different weights: from 2 to 12 kg (4.4 to 26.4 lb). Thanks to its softer and safer texture, with only one tool it is possible to create or innovate a group activity training format already present into your club, from the indoor cycling to step classes... also on wooden floors.

FLUIKETTLE
