

TRAIN TO REACT

FLUIPUMP

REAXING

FLUIPUMP

“The Fluiump is an extraordinary fitness product which revolutionizes the standard weightlifting tools used for fitness in training rooms.”

It adds unpredictability, safety, entertainment, and many more workout combinations. The Fluiump is composed by a Fluiump bar, available in two versions and two Fluiump balls which have 3 different weights of 2, 3 and 4 kg (4.4, 6.6 and 8.8 lb), easily recognizable thanks to different colors. The instability and unpredictability of the fluid inside, make this tool really functional: dynamically unpredictable, soft, safe and versatile. Water movement strengthens the core, activates stabilizing muscles and a considerable metabolic activity as a result of an increased muscular activation. The progression from easy to hard based on the athlete's needs and ability, allows the trainers to plan fun, effective and motivating training sessions. The Fluiump turns every workout into a genuine neuromuscular training, much more effective in terms of metabolism compared to the standard workout.

Reaxing is the first company in the world to develop a training methodology and a product range exploiting the “Sudden Dynamic Impulse” technology. Unpredictable stimuli train your senses and take training to a much higher level in terms of quality and quantity by increasing sports performance and metabolic activity, improving muscle reaction time and reliability in post-trauma recovery phases, as well as reducing the risk of injuries.

TECHNICAL SPECS

The Fluiump allows the user to execute an endless number of exercises because it can be used in four different manners:

- 1) using the Fluiump only;
- 2) using the Fluiump bar with only one Fluiump ball;
- 3) using the Fluiump bar with both Fluiump Balls;
- 4) using the Fluiump Balls only (like Fluiballs).
